Personal Applications of Sustainability:

[Solar-Powered Farm](#) 1996-2009
(www.moorepartners.ca/farm.cfm)

- Sheep, cattle, pigs, chickens, horses on 100 acres
- Ministry of Natural Resources Stewardship Plan
- House built around an original reconstructed 1875 log home
- Solar modules: 18 x 75w = 1350 w
- Surrette Batteries: 2770 Ah lead-acid
- Trace Inverter: 2500 w S/W
- One-cylinder, 5.5 kW propane generator
- Heated, underground generator house
- Two MPPTs, Solar Boost and Outback
- Cabling and heating element for diversion load to heat water

[Earth-sheltered Home](#) 2010
(www.moorepartners.ca/notes.cfm)

Our home is a hybrid, mostly underground with a small, two-story attachment so we can see the river from our office on the second floor.

- ICF and SIP construction
- Locally sourced barnboard siding
- Green roof, no lawn
- Stonework from the building site
- Post and beam interior with 20-inch B.C. fir beams and reclaimed 2-inch pine decking from a 1920s Ottawa aircraft hanger
- Reclaimed doors and light fixtures
- Cork floors
- Solar hot water, HVAC and EVAC
- Two-story Trombe wall, thermal mass, woodstove, and hydronic heating
- Biological aerobic waste system
- Pending LEED platinum certification
